

CK DIRECT

... Commercial Kitchen Extraction & Ventilation Equipment

About CK Direct ...

After many years experience in the supplying of Catering Equipment, **Commercial Kitchens Direct (CK Direct)** was formed in 2002 solely to supply and install extraction canopy & ventilation systems.

CK Direct realizes the canopy system is a large part of the investment when setting up a new kitchen, especially now as Gas Interlocks and Air Input Systems are mandatory to the extract system, therefore the company invested heavily in fabrication machinery and a skilled work force who worked tirelessly to reduce our prices to achieve the final result a fully compliant and efficient extraction system.

Through experience, improved efficiency and buying power, CK Direct is able to supply high quality extraction systems at a competitive price.
